Bridge Program

The Bridge Program is a free enrichment program that helps to build fundamental skills in the literacy, math, social/emotional and cognitive areas three days a week (Tuesday, Wednesday, and Thursday) for fall semester. Our Bridge Program experts use the Texas Prekindergarten Guidelines as the reference to design the curriculum. In September the 3's-4's and Pre-K began the bridge program, the children were introduced to the each subject and teachers as researchers and supporters used their skills to help enhance children's learning by working side by side in a small group. Children showed improvement with transitioning smoothly into their groups. In social/emotional children focused on identifying their emotions, practiced emotional techniques; such as taking a breather counting to ten, and proper communication skills. In math, children focused on basic counting starting 1-10 then increased using individual teaching. Children had the opportunity to connect numerals with quantity. As for language children focused on a letter a week: identifying the sound, rhyming, and syllables.

Parents are you aware of the Texas School Guidelines? Do you practice these techniques? Let's work together as we prepare to get your child "school-ready".

Trike-A-Thon (Thank You Parents)

September 21st-25th the children participated in a week long fundraising program that taught them riding-bike safety. They learned the rules of the road and always wearing a helmet when riding a bike. The trike-a-thon fundraising program helps support the work of the St. Jude Children's research program. The staff and children of The Chinese Community Center Early Learning Center raised donations by

selling artwork and raising donations individually with family and friends. CCC Early Learning Center set a goal to reach \$1,000 and with all the support from our families and staff we managed to reach our goal and raised \$4,240.10. On October 1st the children and staff will celebrate by enjoying a delicious treat- ice cream! Thank you again to all our children, families, and staff for all their support and participation!

Upcoming Events
