

# Early Learning Center

June 2017

## *Splash/Sprinkler Day*

Summer is approaching and we are all excited for our annual event- Summer Splash/Sprinkler Days! Every summer starting in June CCC Early Learning Center host a water day for children once a week. Pools, bubbles, sprinklers, balls, etc. are among the materials we provide for children to enjoy summer.

**Did you know?** Water play helps improve children's balance and strength. Swimming develops muscles and motor skills and helps improve coordination. Water play allows children to explore and interact with each other. New experiences and discovering new things within shared spaces offer a great opportunity for social development.

**Let's make this summer a great one and help get involve this summer. We will be asking for donations on pools and water materials for this event. For more information please see your child's teacher.**
